

S-E-A Construction Practice

Know.

Whether representing a subcontractor, general contractor or all parties contained within a CCIP/OCIP, the S-E-A team of testifying professionals comes with decades of experience, expertise and knowledge to help with cases in the construction litigation arena. Supporting an industry expected to top \$17 trillion within the next decade, the S-E-A Construction Practice was established to help analyze incidents surrounding the safety of construction workers, the cranes and equipment they utilize, and the varied structures they create.

Construction sites continue to be one the most dangerous places to work in the United States.
