

S-E-A Consumer Products Practice

Know.

How can S-E-A help clients to deliver high performing and safe products? What can be done to assess whether a product truly contributed to an accident? By combining 50+ years of multi-disciplined forensics and testing experience with state-of-the-art facilities and equipment, S-E-A's engineers and consultants are uniquely positioned to help clients mitigate risk, confirm products meet performance expectations, and reveal the cause of accidents.

Providing technical expertise for manufacturing processes, product design, and performance/safety training.
