

# S-E-A Energy & Utilities Practice

Know.

Energy is used to light our homes, power our businesses, manufacture our products, and keep industries moving around the world. But when those systems and facilities fail, there can be serious consequences that leave us questioning what happened and who is responsible. Our Energy & Utilities Practice uses a multi-disciplined approach to tackle some of the most complex energy, oil and gas, and manufacturing incidents occurring today.

The future of energy is rapidly evolving, and sustainability and innovation will be central to meeting global energy demands.
